## Summary

---

Full stack developer with over 5 years of experience building scalable, high-performance web applications using JavaScript, TypeScript, React, Next.js, and Node.js. Strong focus on frontend architecture, UX/UI optimization, and API integration. Proven track record of improving user satisfaction, reducing technical debt, and accelerating delivery in multidisciplinary teams.

## Skills

---

**Languages:** JavaScript (Advanced), TypeScript (Advanced)

**Frameworks & Libraries:** React, Next.js, Node.js, NestJS, Astro

**Databases:** MySQL, MongoDB, Firebase

**UI & Styling:** Tailwind CSS, Material UI

**Tools & Platforms:** Docker, AWS, Git, REST APIs

## Experience

---

**e-Contact**, Full Stack Developer

Remote (Chile)

- Redesigned the main platform interface, increasing user satisfaction by 70% through accessibility and UX/UI improvements.
- Implemented reusable React and TypeScript components, reducing technical debt by approximately 30% and accelerating new feature development.
- Integrated APIs and authentication flows with the backend team, improving system stability and reducing production incidents.
- Developed an internal process documentation platform that optimized cross-team collaboration and reduced onboarding time by 40%.
- Led internal training sessions on HTML, CSS, and JavaScript, elevating the technical level of the team.

Dic 2022 – March 2026  
3 years 3 months

**Citybest**, Frontend Developer

Chile

- Designed and developed the main landing page optimized for SEO and performance, achieving a 25% improvement in load times.
- Implemented improvements to the administrative panel and user management system, increasing internal team operational efficiency.
- Collaborated closely with the Node.js backend team to ensure seamless frontend and API integration.

May 2022 – Nov 2022  
7 months

**Adalove**, Full Stack Developer

Argentina

- Enhanced the user interface with new features and interactive animations, increasing user retention by 15%.
- Participated in the progressive migration of the project to TypeScript, improving maintainability and reducing production errors.
- Integrated APIs developed in NestJS, ensuring a consistent and stable user experience.

Nov 2021 – May 2022  
7 months

## Projects

---

### Sport-Manager

Full stack management system for sports complexes using Next.js, NestJS, and Supabase.

- Integrated Supabase for database management and secure authentication with role-based access control.
- Built the API for reservation management, court availability, and user administration with strict typing and robust validation.

### Fit-Manager

Full stack gym management application using Next.js, Node.js, and TypeScript.

- Designed an administrative dashboard with key gym metrics to facilitate data-driven decision-making.
- Built a modular architecture with reusable components and strict TypeScript typing to ensure scalability and reduce development errors.
